

CRANE Audit

Crane Audit

combines powerful Sales & Tax Audit and BIDT Audit modules into one unified platform, giving airlines full control over revenue accuracy, compliance, and distribution cost management. It also includes controls over credit card transactions, ensuring payments are settled according to agreed % commission rates and settlement periods.

Helping your airline secure revenue with absolute certainty

Crane Audit helps your airline protect revenue, reduce risks, and optimize costs — all from a single, seamless solution. Going beyond a standard audit tool, Crane Audit delivers end-to-end, 360-degree audit management with its suite of complementary modules, ensuring your airline is supported at every stage of the audit journey.

Your Airline's Complete Revenue Assurance Solution

Why Crane Audit?

End-to-End Revenue Validation

Automatically reconcile ticket sales, tax filings, and BSP data to detect discrepancies early; protecting your revenue before any issues escalate.

Credit Card Transactions Validation

To ensure that payments are credited to the correct accounts in line with the expected settlement periods and commission rates. This helps detect potential revenue losses or leakages.

Proactive Detection of Booking Abuses

Identifies and flags any churning, fictitious, duplicate, and inactive bookings across all channels; reducing both revenue leakage and fraud.

Automated ADM Management

Enforces airline ADM policies with automated issuance and streamlined recovery workflows; cutting manual effort and improving compliance.

Smarter Cost Optimization

Delivers sector-wise GDS cost insights to help you manage and minimize distribution expenses effectively.

Real-Time, Actionable Reporting

Gain full visibility through intuitive dashboards and multi-channel analytics — enabling faster, data-driven decisions.

Key Features

- Automated sales vs. tax data reconciliation
- BSP/IATA-compliant audit trails
- Interline and codeshare transaction verification
- Timely detection of booking abuses
- Automated ADM creation and enforcement
- Sector-based GDS cost reporting
- Customizable workflows and real-time reporting
- Integration with financial and revenue systems
