

CRANE CFS

Crane Customs Filing System

is a comprehensive solution designed to simplify and enhance customs compliance for airlines. With compatibility IATA PLACI requirements and across multiple customs systems, Crane CFS ensures seamless communication with global customs authorities. By streamlining customs processes and proactively addressing regulatory requirements, Crane CFS empowers airlines to optimize operations and maintain accuracy in every step of the air transportation.

From Complex Customs to Simplified, Effortless Compliance

With Crane CFS, airlines gain more than a customs filing system and they gain a strategic partner for efficiency, accuracy, and compliance. Simplify your customs processes and keep your operations running smoothly, wherever your flights take you.

Navigate Customs with Confidence

Why Crane CFS?

Seamless Global Customs Compliance

With full IATA PLACI compliancy, Crane CFS ensures smooth communication with multiple customs authorities worldwide, including ICS2, ACAS, NAIC, PACT, PreDICT, and ASCYUDA.

Pre-Loading Filing Capabilities

Crane CFS empowers airlines to submit customs declarations before shipments depart. By addressing regulatory requirements proactively, it reduces delays, risks, and potential penalties — keeping operations on schedule.

Optimized Supply Chain Operations

Crane CFS provides clarity over regulatory interactions and timely message exchange, allowing airlines to streamline customs processes.

SaaS Delivery Model for Easy Access

Crane CFS is available as a SaaS solution hosted by Hitit. Airlines benefit from fast deployment, secure access, and effortless scalability without the need for complex local infrastructure.
