

# CRANE CRA

## Crane Cargo Revenue Accounting

is designed to optimize the accounting of airline's air waybill and interline cargo revenue. It ensures timely reporting of all accounting related cargo transactions, operating in continuous coordination with cargo management systems. By easily uploading both CASS and non-CASS files of AWB sales data directly in the system, it simplifies cargo revenue accounting process. Regarding cargo revenue proration it provides settlements with other airlines through the interline accounting capability. Proration is easily processed by means of PFM/APD/SPA with full compliancy of IATA reso's.

## Revenue Made Simple, Accurate, and Fast.

Crane.CRA delivers confidence and efficiency in every financial transaction, ensuring your airline maximizes cargo revenue while reducing complexity and operational risk.

# Activate Cargo Data for Revenue Power

# Why Crane CRA?

## Automated Revenue Proration & Settlements

Ensures precise cargo revenue distribution and interline settlements by automating PFM/ APD/SPA pricing and handling both CASS and non-CASS AWB data.

## Seamless IATA & SIS Compliance

Simplifies regulatory compliance by generating and uploading SIS-IATA files, enabling error-free invoicing and reporting for both incoming and outgoing interline transactions.

## Comprehensive Accounting Oversight

Handles own AWB sales, interline invoices, charge memos, and data transfers while providing detailed reporting and paperless billing timely, giving airlines full visibility and operational efficiency in cargo revenue management.
