

# CRANE ALM

## **Crane Allotment Management**

is Hitit's agile and comprehensive allotment manager, designed to give airlines full control over their inventory across both scheduled and charter operations — from upfront planning to daily execution, billing, and reporting.

## **Elevate Your Charter Operations with Crane ALM**

Crane ALM empowers airlines to manage charter and tour operator operations with agility, transparency, and control — bringing together planning, execution, billing, and reporting under one intelligent, scalable platform. Whether deployed standalone or integrated with Crane PSS suite, it ensures operational excellence and adaptability for modern aviation.

# Agile Charter & Allotment Management

# Why Crane ALM?

## Unified Inventory Oversight

Crane ALM delivers unified inventory visibility and control — empowering airlines to effectively plan, distribute, and manage inventory across direct channels, tour operators, and B2B partners using real-time consolidated views and intuitive modification tools.

## Dynamic Ancillary Distribution

Equipped with flexible ancillary management capabilities, airlines can define new products or services with just a few clicks and make them available for sale via tour operators or directly to passengers across all channels, including web and mobile self-service.

## Reduced Workload & Automated Operations

From seasonal planning modules and tariff pricing wizards to automated contract creation and real-time cross-checking with tour operators, Crane ALM streamlines complex operations, reducing both time and cost.

## Instant Activation & Full Compatibility

Compliant with IATA standards and supporting common travel industry formats, Crane ALM enables seamless integration with hundreds of tour operators and the processing of millions of charter passengers.

## Key Features
