

CRANE RA

Crane Revenue Accounting

is Hitit's advanced solution that automates and streamlines airline revenue processes from direct sales to complex interline agreements, ensuring complete financial control, compliance and efficiency.

Turn airline revenue accounting into a competitive advantage powered by accuracy, transparency, and future scalability.

With Crane RA, airlines turn revenue accounting into a strategic advantage. By automating complex processes and delivering real time visibility, Crane RA helps finance teams reduce costs, improve accuracy, and accelerate financial close. Fully integrated within Hitit's end to end airline technology ecosystem, Crane RA empowers airlines to scale confidently, respond faster to change, and maximize revenue performance today and in the future.

Simplify Your Airline Revenue Accounting

Why Crane RA?

Real-Time Revenue Data

Daily sales, lift, BSP, RET and HOT files are processed and reconciled automatically, providing near-instant insight into revenue flows.

Less Manual Work

A user-friendly, intuitive interface minimizes the need for extensive training or large operational teams.

Full Visibility & ERP Integration

All revenue streams are tracked across channels (GDS, direct, indirect) with seamless ERP and general ledger connectivity.

Automated Interline Proration

Built-in proration engine supports all interline agreement scenarios (including SPA and codeshare), eliminating manual effort and increasing accuracy.

Customizable Workflows & Controls

Airline-specific commercial rules and revenue policies can be configured, including exception handling.

Future-Ready Architecture

Integrated support for ETKT, ticketless and ONE Order models, along with flexible integration with DCS, GDS, ATPCO, and more.

Key Features

- Sales & Coupon Data Management
- Interline & Code-share Transaction Processing
- SIS-Compliant Billing & Paperless Invoicing
- Automated Tax Handling (ATPCO fee file support)
- Financial & Tax Reporting with Full Audit Trail
