

CRANE CREW

Crane CREW is a comprehensive crew management system designed for airlines, covering the entire crew lifecycle from leave management and rostering to payroll and reporting. It delivers cost-effective optimization, lifestyle-aware scheduling, and real-time tracking, supported by strong integration, analytics, and continuous innovation.

Redefining Efficiency in Crew Management

With Crane CREW, airlines gain more than just a crew management system: They gain a strategic partner in achieving operational excellence. By blending automation with human-centric design, real-time intelligence, and continuous innovation, Crane CREW transforms complex crew operations into streamlined processes that are both data-driven and people-focused.

Streamlining Crew Management & Planning

Why Crane CREW?

Comprehensive Crew Management

Covers the entire crew lifecycle from annual leave management to payroll, ensuring a seamless, end-to-end process

Cost-Effective Optimization

Built-in pairing and rostering optimizers reduce operational costs while improving efficiency.

Human-Centric Scheduling

Considers crew requests and lifestyle preferences for higher satisfaction and better work-life balance.

Advanced Scheduling Engine

A well-designed, fast, and intuitive scheduler enhances user experience and minimizes planning time.

Integrated Tracking Module

Includes a robust real-time tracking system tightly integrated with the Crew Mobile App for smooth daily operations.

Powerful Reporting & Analytics

Offers comprehensive reporting tools and strong integration capabilities for data-driven decision-making.

Continuous Evolution

A constantly evolving platform, ensuring alignment with the latest industry needs, technology, and regulations.

Operational Efficiency

Streamlines crew processes, minimizes manual work, and ensures compliance with airline policies.

Key Features

- Crew Management
- Leave Management
- Pairing & Rostering Optimization
- Scheduler & User Experience
- Tracking
- Reporting & Analytics
- Integration & Scalability
- Compliance & Security

Crew in Touch (Mobile Companion App)

Crew in Touch, the mobile companion app to Crane CREW, keeps crew members connected wherever they are. It provides real-time calendar access (published and actual), smart notifications, geofencing-based check-in, and tools to manage documents, track expiries, and communicate directly with airline departments therefore ensuring seamless coordination and enhanced crew satisfaction.
